Hamza Oubahim

Full Stack Developer

PROFILE

I work across the frontend and backend on web platforms, analytics features, and personal projects. I am currently building a video editor for short-form content.

EXPERIENCE

Full Stack Developer
Mergefy
June 2026 – Present
I build and maintain features for the Mergefy web platform.

Front-End Web Developer
TBH-Montreal
February 2025 – Present
I build frontend features for The Big Heart Association, add analytics and user-behavior tracking, and improve the experience with my team.

Software Developer
Hospital Mohamed Bouafi, Casablanca
September 2022 – October 2022
I built a Python desktop app for patient records. I worked on the database, data entry, validation, and reports.

EDUCATION

AEC in Web Development
College Lasalle Montreal
August 2024 – Present
Coursework in database management, object-oriented programming, computer architecture, data structures, and algorithms.

DEP in Full Stack Development
OFPPT Casablanca
August 2021 – August 2023
Application development with Python, SQL databases, data analysis, and system architecture.

PROJECTS

Video Editor · Hamza

Selected project

I am building a video editor for talking-head recordings. It transcribes audio, adds captions and B-roll, creates clips, and exports them for social platforms.

Technologies: NestJS, TypeScript, PostgreSQL, TypeORM, Redis, FFmpeg, Remotion, Deepgram

Journey Assistant

Selected project

A travel app that suggests places based on a person’s preferences. It gets information from an API and stores travel data in a database.

Technologies: React, Laravel

Ebook Platform

Selected project

I made a content management tool with user sign-in, an analytics dashboard, and a MySQL database.

Technologies: PHP, MySQL

https://thuswespeak.com

DEVIS PRO

Selected project

A business tool for setting prices, reviewing customer data, and generating reports.

Patient Data Management System

Selected project

A Python desktop app I made to manage patient records, enter data, and create reports.

Technologies: Python, Tkinter, SQL

Mergefy.io

Selected project

Frontend: Next.js 16, React 19, TypeScript, Tailwind CSS 4; browser tracking SDK for Shopify and first-party events. Backend: NestJS 11, Node.js/TypeScript, TypeORM; PostgreSQL 17, Redis 7 with BullMQ; Firebase/JWT auth, Stripe billing, Sentry; Docker Compose.

Technologies: Next.js 16, React 19, TypeScript, Tailwind CSS 4, Shopify tracking SDK, First-party events, NestJS 11, Node.js, TypeORM, PostgreSQL 17, Redis 7, BullMQ, Firebase/JWT auth, Stripe billing, Sentry, Docker Compose
